CERTIFICATE Portable Water Supply

This is to certify that Yogi Vemana University is equipped with 7-bore wells and one underground water storage tank.

This certificate serves as confirmation that a water quality analysis was conducted at Yogi Vemana University on 23-01-2024. Samples were collected from various sources, including seven bore wells and dedicated water storage tanks. The collected water samples underwent rigorous testing through reverse osmosis (RO) systems, a highly effective purification method. The analysis results confirm that the treated water meets all established safety standards for potable water consumption.

Therefore, we are pleased to declare that the drinking water supply at Yogi Vemana University is safe and suitable for human consumption.
