## CERTIFICATE

### Electrical Grid Power supply

Yogi Vemana University is equipped with 500 KV, 315 KV, and 50 KV Sub-stations which are connected to the grid to meet the power requirements. All the power supply and connections are well maintained by the Engineering Department.

This certificate confirms that Yogi Vemana University is equipped with a reliable and robust electrical grid power supply system. The system comprises:

- Multiple interconnected feeders: These feeders ensure redundancy and minimize the risk of power outages.
- Adequate transformers: The transformers efficiently step down the high-voltage transmission lines to usable levels for the university's various electrical needs.
- Sophisticated protection systems: Advanced surge protection and grounding systems safeguard the electrical infrastructure from damage and ensure the safety of personnel and equipment.
- Regular maintenance and inspections: A dedicated team of qualified professionals routinely maintains and inspects the power supply system to guarantee its optimal performance and prevent potential issues.

Therefore, Yogi Vemana University possesses a dependable electrical grid power supply system that caters to the institution's current and future power requirements.
