Requirements

100 pass with basic computer knowledge

Modern computer with internet 2 MBPS internet Connection

Description

The course covers all the fundamentals of Java programming language, multi-threading, IO and other features and also provides good amount of practice material for Chapter Java Collections. It prepares them with documented learning by doing experience. It ensures active participation of the students using its unique interactive content instead of regular lecture which do not allow students to change the content in the video with its unique interactive strategies. The students can go forward and backward in their course to figure out the exact location of error in their code, which is not possible in traditional strategies. Other functionalities of the course cover the most complex algorithmic logic, students understand the working of code better. By using our product we have observed that the students learn how to debug and resolve issues.

Description

Virtual

1. **Trainers and Mentors** - The Trainers have exceptional experience in training and are an alumnae from IIT, IISc, and IIM. A team of dedicated mentors is provided to the students to help them throughout their learning process.
2. **Student Success Managers** - The Success Managers are available to students to ensure that there should be no hindrance in their learning process and to maintain consistency. The responsibility of Student Success Managers is to guide the students in both academic and non-academic matters.
3. **SMA Forum** - Every query of students will be answered by industry experts and mentors are available at any point of time for students.
4. **Expert Feedback** - Feedback is given by industry experts to students on their assignments and projects, which enhance their skills to learn the various applications of programming language C and Python.
